

UKRAINIAN DEFENSE TECH PAVILION

ORGANIZED BY THE FENICKS GROUP

UKRAINIAN DEFENSE TECHNOLOGY COMES TO AUSA

What has Ukrainian industry built from battlefield experience?

At AUSA 2026, Fenicks Group will bring together Ukrainian defense technology companies in a dedicated private industry pavilion, creating a platform for U.S. and international military, defense-industry, government, investment and media audiences to engage directly with Ukrainian companies and the technologies they are developing.

The Ukrainian Defence Tech Pavilion organized by Fenicks Group will be presented at the AUSA Annual Meeting & Exposition in Washington, D.C., October 12–14, 2026.

The pavilion will showcase seventeen Ukrainian defense technology companies working across a rapidly evolving sector shaped by real operational requirements, battlefield feedback and rapid technological development.

Alongside industry, the pavilion program will feature Ukrainian military personnel with direct combat experience, providing first-hand insight into the realities of modern warfare, the operational requirements facing today's military and the technologies being developed in response.

Ukraine is often discussed internationally through the question of what Ukraine needs.

At AUSA, Fenicks Group wants to facilitate another conversation: what have Ukrainian companies learned, what have they built, and how can they solve today's challenges and fill existing capability gaps?

Built from battlefield experience

The Fenicks Group Ukrainian Defence Tech Pavilion will showcase Ukrainian companies whose technologies have been shaped by the realities of modern warfare.

In Ukraine, the development process can move rapidly from:

Operational requirement → Development → Deployment → Feedback → Iteration

This direct connection between technology developers and operational users has created an environment where companies are required to test, learn and adapt at speed.

The pavilion will bring together companies working across a range of defense technology areas, including unmanned systems, electronic warfare, AI and software, sensing and communications, ground systems, power and other technologies responding to contemporary battlefield requirements.

The focus is not only on the technologies themselves, but also on the people, experience and development processes behind them.

From battlefield experience to international partnership

The pavilion will facilitate U.S. and international audiences meeting with Ukrainian companies.

For US defense Industry: Ukrainian companies can be technology, engineering, manufacturing and development partners — not just suppliers. And how Fenicks Group can facilitate the conversation and be the conduit.

For US Military: Ukrainian companies offer technologies shaped by real operational requirements, together with practical experience of developing and adapting those technologies under battlefield conditions. And Fenicks Group's network of resellers is the avenue for acquisition.

For US Government: Engagement with Ukrainian defense companies can create opportunities for industrial cooperation, technology partnerships and shared defense capability. And how Fenicks Group can facilitate the conversation and be the conduit.

Discussions, presentations and military experience

During the AUSA exhibition, the **Fenicks Group Ukrainian Defense Tech Pavilion** will host a program of company presentations, discussions and sessions featuring Ukrainian military personnel sharing lessons and operational experience from nearly five years of full-scale war.

The program will connect the technologies being developed by Ukrainian companies with the operational realities that have shaped them.

Visitors will have the opportunity to hear directly from the people developing and using these technologies and explore how battlefield experience is influencing defense technology development.

The pavilion will also provide opportunities for bilateral meetings, media briefings, technology discussions and conversations with US and international defense companies, government stakeholders, investors and potential industrial partners.

Who will be there

The pavilion will bring together a group of Ukrainian defense technology companies and technology developers, alongside Ukrainian military participants in the pavilion's program.

Participating Ukrainian companies

The following booths in the Ukrainian Defence Tech Pavilion are reserved for approximately 16 participating companies.

TENCORE – <https://tencore.com.ua>

KVERTUS – <https://kvertus.ua>

DAMBA.TECH – <https://damba.tech>

OSIRIS AI – <https://osirisai.com>

PHANTOM DEFENSE – <https://phantomdefense.tech>

STELLARION – <https://www.stellarion.group/en>

REACTIVE DRONE – <https://reactivedrone.ua/uk/>

SICH – <https://sich.ua>

STRUMKO – <https://strumko.com>

TARGUN – <https://www.targun.com.ua>

UKRSPECSYSTEMS – <https://ukrspecsystems.com/uk>

UNWAVE – <https://unwave.com.ua>

U-TACTIC – www.utacticusa.com/

FAHRENHEIT – www.fahrenheitus.com/

META BUREAU – www.metabureau.tech

THIRD ARMY CORPS – <https://ab3.army>

FENICKS GROUP – <https://fenicks.com/>

The full roster and additional program details will be announced closer to the opening of the exhibition through Fenicks Group's official communications channels.

If you are interested in covering the Fenicks Group Ukrainian Defence Tech Pavilion at AUSA 2026, arranging an interview, meeting participating companies or receiving information about the program and media opportunities, please reply to this email or contact us directly.

We will be happy to share additional information and coordinate media opportunities closer to the event.
